

7_Transfer_learning_for_Image_Classification

21 October 2024 07:01

Download the dataset
from the following address :-

https://download.pytorch.org/tutorial/hymenoptera_data.zip

Various steps to be followed
in the transfer learning are:

- ① Data Loader
- ② Preprocessing
- ③ Load pretrained model
- ④ Freeze the model layers
according to your needs.
- ⑤ Add additional FC layers
according to the problem

to form the model.

⑥ compile and train the model.

Your task is to train the model with different pretrained features and analyse the difference !

① VGG-16

② VGG-19

③ GoogleNet

④ ResNet
